TRUCK CRANE AK52

WWW.TOTALLIFTING.COM

The Böcker AK 52 sets new standards in the 32 t class as 4-axle. Lifting 3,000 kg to a sensational radius of 17 m with a height of 31 m, it is most likely the strongest crane in an aluminium-steel design currently available on the market. The AK 52 also reaches new heights when being used as a working platform. Its extendable cage with a width of 3.5 meters, it impresses with a load capacity of up to 600 kg. Thanks to its small slewing radius, its highly-modern closed hybrid-telescope boom and its fully-hydraulic, telescopic fly jib of 14 m, it is perfect for your job site even when working in tight spaces!
